Education

Indian Institute of Information Technology, Ranchi

Bachelor of Technology in Computer Science & Engineering

2021 – 2025

8.74/10 CGPA

Work Experience

Sunstone

Aug 2025 – Present

Software Development Engineer I

Pune, Maharashtra

- Engineered and maintained **5+ enterprise web and mobile** products using **Next.js, React Native, TypeScript, Redux Toolkit**, and **Material UI** in sprint-based cross-functional teams, shipping features across **3 platforms** simultaneously.
- Architected a full-stack **Mentorship Platform** (Next.js 15, TypeScript, MongoDB) — independently designed **8+ DB schemas** and Mongoose models; integrated **NextAuth.js + Google OAuth** with **RBAC**-protected routes, conflict-free scheduling via **Google Calendar Freebusy API**, automated **Google Meet** link generation, and **Nodemailer** transactional emails.
- Spearheaded a full-stack **Learning Management System** — featuring **Monaco Editor**-powered DSA practice, **Playwright**-based HTML/CSS/JS submission previews, **Zoho**-integrated session recording and live meeting management, **Google Sheets** bulk attendance upload, and a permission-based white-labelled design system for multi-tenant deployments.
- Launched a cross-platform **student portal mobile app** (React Native, TypeScript, Firebase) with **Google OAuth**, secure token storage via **react-native-keychain**, real-time **FCM/APNs** push notifications, deep-link routing, an offline-capable code editor, and **Cashfree & Easebuzz** payment flows handling **fee transactions** for **500+ students**.
- Implemented a **token-based credit system** with automated cancellations and refund logic; built **admin dashboards** for booking lifecycle, user verification, and real-time **analytics**; developed bulk offline reconciliation with CSV parsing and API-driven transaction matching.
- Enforced code quality and reliability via **ESLint, Husky**, and **Commitlint**; optimized data integrity through **DB indexing**, duplicate-prevention constraints, and efficient API workflows across all platforms.

Sunstone

June 2025 – Aug 2025

SDE Intern

Gurugram, Haryana

- Integrated **Cashfree Payments, Supabase PostgreSQL** with RESTful API endpoints, and **MSG91** OTP authentication; authored a **reusable UI component library** (Next.js, TypeScript, Material UI) adopted across **5 products**, reducing UI duplication by **30%**.
- Delivered the **Free Course Platform** (Next.js, TypeScript, Supabase) — implemented **UTM-based marketing attribution** tracking **10+ campaigns**, real-time course progress engine triggering auto certificate generation on completion, a **Nodemailer** email delivery pipeline, and a **Chart.js** analytics dashboard monitoring **500+ daily registrations**.

Projects

Instacart | React, Express.js, MongoDB, JWT, Stripe

[Source Code](#)

- Developed a robust **full stack food delivery** web application with secure user authentication using **JWT** token, enabling users to **log in** and **sign up**.
- Integrated **Stripe payment gateway** for seamless transactions and designed an **admin panel** to manage food items (add/delete) and track order status (processing, out for delivery, delivered).
- Enabled real-time **order tracking** and **order history** for users, enhancing overall experience and order management.

Codezy | Next.js, React, MongoDB, Shadcn UI, Tailwind CSS, NextAuth

[Source Code](#)

- Engineered a full-stack online **code editor** supporting **real-time** execution across **multiple languages** using Next.js, React, and MongoDB.
- Secured the platform with **NextAuth.js** featuring **password recovery** and **email verification**; enforced schema validation via Zod and React Hook Form.
- Crafted a **responsive** UI with Tailwind CSS and Shadcn UI, including a dynamic editor, user **dashboard**, and a hierarchical **project/file management** system.

Technical Skills

Languages: C++, JavaScript, TypeScript, Python

Frontend: React.js, Next.js, TailwindCSS, Material UI

Mobile: React Native, Expo, Firebase (FCM, APNs), react-native-keychain

Backend: Node.js, Express.js, NextAuth.js, Supabase, REST APIs, Nodemailer

Databases: MongoDB, Mongoose, PostgreSQL, MySQL

Payments & Integrations: Cashfree, Easebuzz, Stripe, Google Calendar API, Google OAuth, Google Meet API, MSG91, Zoho

Achievements

- Completed the **Postman Student Expert** certification, demonstrating proficiency in API development, testing, and documentation.
- Rated **Pupil** on **Codeforces** with peak rating **1224**; competed in **25+** rated contests.
- Solved **900+** problems on **LeetCode** with peak contest rating **1766**; ranked in top **10%** globally across **30+** contests.
- Completed **Hacktoberfest 2022**; qualified for internal round of **Smart India Hackathon-2023**; ranked **4th** in **Runtime Terror** and **25th** in **CodeRush**.
